New Fontaine Fifth Wheel Video Shows How to Get the Ultra Connection

Trussville, Ala. (Jan. 12, 2011) – As part of its commitment to customer support and training, Fontaine Fifth Wheel has released a video and document outlining the proper coupling, sliding and uncoupling procedures for its newest fifth wheels, the Fontaine® Ultra LT, Ultra HD and Ultra HR.

“A good fifth wheel connection is critical for the safe operation of a truck and trailer,” explains Terry Mennen, Fontaine Fifth Wheel vice president of sales and marketing. “Our Ultra family of fifth wheels uses a patented lock design that requires specific coupling, sliding and uncoupling procedures. Every operator who drives a truck equipped with a Fontaine Ultra LT, Ultra HD or Ultra HR fifth wheel should review these procedures in order to maximize their safety and performance advantages.”

The training video runs for about eight and a half minutes and features live-action demonstrations of each step of the coupling, sliding and uncoupling processes. It is available for download or online viewing under the “Videos” tab on Fontaine’s website, www.fifthwheel.com.

The full-color training document details the coupling and uncoupling procedures, with photos illustrating key elements. It is available for download on Fontaine’s website at www.fifthwheel.com/support-information.html.

“By following the proper coupling, sliding, and uncoupling procedures for the Ultra LT, Ultra HD and Ultra HR family of fifth wheels, you can count on Fontaine for safe, dependable performance mile after mile,” Mennen says.

For more information about Fontaine Fifth Wheel, visit the website or call (800) 874-9780.
